DEMOLITION PERMIT APPLICATION

APPLICATION No. _____

All Demolition Permit applications must be accompanied by two (2) copies of the documents listed below. Failure to attach all required submittal documents will result in an incomplete application and will not be accepted by town staff.

Permit fees are **\$100 for single family residences** and **\$125 for commercial structures**.

*****All debris from demolition must be disposed of Call**

THIS PAGE TO BE COMPLETED BY Town STAFF AT THE TIME OF APPLICATION

Required Submittals

- 1 Completed Application Signed by Applicant
- 2 Two (2): **Scaled** site plans showing the following elements:
 - (a)** Building(s) to be demolished
 - (b)** Existing structures, utilities, easements and rights-of-way
 - (c)** Street access
 - (d)** Nearest fire hydrant
- IMPORTANT!** Items (a) – (d) above must be **clearly marked** or the application cannot be accepted.
- 3 Provide a Demolition Plan and Schedule. See General Information and Submittal Requirements on page 4 of this application. A Town Street Excavation Permit will be necessary if any work will be done on or near the Town right-of-way.
ALL UTILITIES MUST BE PROPERLY ABANDONED
- 4 Utility cut-off date and a description of how each utility will be abandoned.
- 5 An **Asbestos Survey** is required if the structure was built before 1980. If non-exempt quantities of asbestos are identified, please submit a copy of the Northwest Clean Air Agency approval and a Waste Shipment Record for disposable at a disposal site approved by Northwest Clean Air Agency (refer to attached Northwest Clean Air Agency forms).
- 6 Payment of application fee.

Application accepted by: _____ **Date:** _____

PROJECT SITE IDENTIFICATION

Site Address: _____ **Parcel I.D. #:** _____ (Refer to Skagit County Assessor website)

Date structure was built: _____

Size of structure to be demolished: _____ square feet

Current and historical use of structure: _____

Attach required demolition schedule

Attach Asbestos Survey

Asbestos present? Yes No – If yes, attach Northwest Clean Air Agency approval and waste shipment record.

Will any grading take place? Yes No – If yes, how many cubic yards (CY) are being moved? _____ cubic yards

Are there any other existing structures on the property that will not be demolished? Yes No

Utilities cut off and capped? Yes No – Provide utility cut off date information – **REQUIRED**

SECTION II – DEMOLITION SCHEDULE AND UTILITIES DECOMMISSIONING

DEMOLITION PLAN AND SCHEDULE

Please describe the plan for how the structure(s) will be demolished. Include the equipment that will be used and the timing (and duration) of the planned demolition work. The demolition plan and proposed schedule must be approved prior to demolition.

UTILITIES DECOMMISSIONING

All utilities must be properly abandoned. Please provide the utility cut-off date and a description off how each utility will be abandoned. The Town must inspect any capped-off connections to the Septic. A Street Excavation Permit will be required if any work is done on or near the Town right-of-way.

SECTION III - SIGNATURE

Complete for this application. Failure to sign the permit application will result in an incomplete application.

Application is hereby DEMOLITION PERMIT. I certify that I am familiar with the information contained in this application and that to the best of my knowledge and belief such information is true, complete, and accurate. I further certify that I possess the authority to undertake the proposed activities. I hereby grant to the officials of the Town of Lyman the right to enter the above-described property to inspect the property as part of the permit application review and approval process and/or the proposed or completed work.

Signature (Required): _____ **Date:** _____

DEMOLITION PERMIT APPLICATION

GENERAL INFORMATION AND SUBMITTAL REQUIREMENTS

DEMOLITION PLAN & SCHEDULE: A Demolition plan and schedule, describing how the structure(s) will be demolished, equipment that will be used to do the work, the timing of the work and duration of the work shall be submitted for review. **All debris from demolition must be disposed.**

SITE PLAN: All demolition permits must be accompanied by a site plan identifying all structures to be demolished and the location and size of existing structures and construction that are to remain on the site in relation to the property boundaries. Additionally, the site plan must identify the utilities serving the structure to be demolished. These utilities include: water supply, sewage disposal, electrical service, and gas supply (natural or propane).

UTILITIES: All utilities **MUST BE PROPERLY ABANDONED.** You will need to provide utility cut off date and a description on how each utility was abandoned. **A Town inspection is required for capping off connections to Septic. If working on or near the Town Right-of-Way a Street Excavation Permit is required to be obtained.**

ASBESTOS: It is presumed that all buildings within the Town of Lyman built before 1980 have "friable asbestos." Prior to issuance of a Demolition Permit for buildings built before 1980 the Building Department requires an asbestos survey to be completed pursuant to the Northwest Clean Air Agency (360-428-1617) and the results attached to the demolition permit application form. If non-exempt quantities of asbestos are identified in the structure you will be required to abate and properly dispose the asbestos prior to issuance of a Town Demolition Permit. If abatement is required a copy of the Northwest Clean Air Agency Approval along with the waste shipment record shall be attached to the application form along with the asbestos survey.

ACCESS: Access for Fire Department apparatus shall be provided and maintained. If working in or near the Town Right-of-Way (ROW) a Town Street Excavation permit is required. All Fire Hydrants are required to be kept clear at all times.

PEDESTRIAN PROTECTION: Pedestrian protection **MAY** be required for the protection of pedestrians when in the opinion of the Building Official the location and/or demolition schedule exposes the public to risk during the demolition process.

WATER SUPPLY: The property must have a working water supply made available to it prior to the start of demolition work. Water may be supplied via a portable water tank, Town water connection, or a fire hydrant. Access to fire hydrants shall not be obstructed.

CUTTING AND WELDING OPERATIONS: **A suitable, approved type of fire extinguisher shall be kept at the location where welding or cutting is being done. A fire watch shall be on hand to make use of the fire extinguisher if welding or cutting is done above or within 10 feet of combustible construction or material, and a fire watch shall be maintained for at least 1-hour after completion of cutting or welding operations.**

INSTRUCTIONS FOR FILING APPLICATION FOR RESIDENT-OWNER ASBESTOS PROJECT

Asbestos is a hazardous, fibrous mineral used in over 3000 building materials that can be released to the breathing zone during renovation/demolition activities to lodge deep in your lungs and cause permanent negative health effects. That is why the Washington Administration Code and the Northwest Clean Air Agency (NWCAA) regulate the removal of asbestos. This form is provided for homeowners who choose to remove asbestos-containing building materials from their own homes, which they occupy, the only exception to State rules requiring use of Certified Asbestos Abatement Contractors for asbestos projects. **Landlords must not disturb asbestos in rental properties.** It is our goal to provide you with information so that you will handle this material safely.

The NWCAA Regulation Section 570 requires that NWCAA be notified in advance on this form of *all* asbestos abatement projects or demolitions involving owner-occupied, single family residences. This Regulation can be found on our Web Site: www.nwcleanair.org.

Mail or deliver this application with a \$25 processing fee to the Northwest Clean Air Agency at 1600 South Second Street, Mount Vernon, WA 98273-5202. **A copy stamped "received" will be returned to you promptly.** This will also be your permit for disposal. A copy must accompany the asbestos waste when deposited at a waste disposal site.

Please call our office prior to removing asbestos. A brief conversation regarding your project will ensure your project, is as safe, easy, and cost-effective as possible (360) 428-1617.

Quantity to be removed: please estimate the square footage or linear feet for pipe work.

Project starting date and completion date: Application must be received prior to starting the project.

Site Address: This is where the project will take place.

Has material to be removed been sampled and analyzed: NWCAA can provide a list of companies that can analyze material to see if it contains asbestos or look in your phone book under Asbestos Consulting and Testing.

Type of material to be removed: Check what you know to have asbestos. NWCAA can provide information on how to find common asbestos-containing areas and how to remove asbestos safely.

Control measures and personal protection equipment: Please check the equipment you will be using. If you would like information on equipment that will help you safely remove asbestos, please contact the NWCAA.

Asbestos disposal site: If you would like a list of waste facilities that accept properly packaged asbestos waste, please contact our office.

This is not an approval but a permit. You are responsible for the accuracy of the information provided to the NWCAA. This form must be taken with you when you take your asbestos to an approved waste site. If you have any questions, please call 360-428-1617.

INSTRUCTIONS FILING A WRITTEN NOTICE OF INTENT TO PERFORM AN ASBESTOS PROJECT

Written notice required by NWCAA Regulation Section 570 must be submitted on this form. If this notice is submitted by mail, the appropriate fee must be enclosed. A copy of your notice must accompany the asbestos waste when deposited at a waste disposal site. The required "Advance Notification Period" begins on the day that a properly completed notice and appropriate fee is received.

NOTE: FOR ALL AMENDMENTS TO THIS APPLICATION, USE AMENDMENT TO NOTICE OF INTENT TO PERFORM AN ASBESTOS PROJECT .

TYPE OF PROJECT

Check the applicable box that pertains to your type of asbestos project.

PROJECT CATEGORY

Check the applicable box that indicated your project category, Advance Notification Period and Notification Fee. Residential projects must be confined to occupied dwellings; other restrictions may apply.

QUANTITY TO BE REMOVED\ENCAPSULATED

Indicate amount of asbestos material and attach appropriate fee.

PROJECT STARTING AND COMPLETION DATES

Dates must be consistent in accordance to required Advance Notification Period in Section 570.32. Unless you are notified otherwise, begin your project on the scheduled starting date. NWCAA will send you a copy of your Notice of Intent stamped "received". Retain a copy of your Notice of Intent for the disposal site.

WORKSHIFT DAYS AND HOURS

Indicate days and hours on site.

JOB SITE ADDRESS

Must be complete and include building numbers, school names, or any other identifying information. For complete demolition of structure, give the anticipated date that the actual demolition will begin.

TYPE OF MATERIAL TO BE REMOVED AND CONTROL MEASURES

Indicated by checking the appropriate box(es)

ASBESTOS CONTRACTOR (list the following)

1. Name and address of contractor.
2. Site Contact, and Asbestos Certification number.
3. Name of owner or chief executive officer and telephone number

PROPERTY OWNER (list the following)

1. Name and address of property owner.
2. Site contact or property owner, Title, and telephone number

DISPOSAL SITE NAME AND LOCATION

Specify the asbestos disposal site.

INDICATE COST OF ASBESTOS PROJECT (do not include non-asbestos related costs).

SIGNATURE AND TITLE OF RESPONSIBLE PERSON AND WHO PARTY IS REPRESENTING.
